

myGalileoDrone

The contest is targeting the design and development of drone-based apps and services using a Galileo enabled receiver.

Galileo can be used on the drone, smartphone app, payload, or in any other device supporting the Galileo drone application.

Wide scope of the competition will ensure a broad participation of national and regional entrepreneurial ecosystems.

The deadline for the 1st step of the competition is **31 August 2020 at 23:59 CET**.

The competition will consist of 3 phases. Winners will be announced on 28 January 2021.

More info on the GSA website: www.gsa.europa.eu/mygalileodrone.

The competition will award in total **230.000 euros of prizes**.

The market related to drone apps and services is growing at a fast pace with the European drone service revenues expected to reach 250 million euros by 2025.

The European demand is estimated to reach 10 billion annually in nominal terms, by 2035 and over 15 billion annually by 2050, creating more than 100,000 jobs.

The aim is to strengthen competitiveness of the EU's companies at a global level.

Who can apply? **Start-ups, App Developers, Entrepreneurs, Students, SMEs, ...**
